

Eco Solution Q Fiber

Shaw Contract Groups is committed to sustainable solutions for today's commercial markets. Eco Solution Q our branded nylon 6 fiber used in a majority of our commercial tile and broadloom carpet. Noted for its aesthetics and recyclability, Eco Solution Q is the industry's only cradle to cradle fiber.

FIBER EXPERTISE:

- In 2007, over 85 percent of the total yards of carpet produced by Shaw Contract Group were constructed with Eco Solution Q
- Shaw's fiber division leaders average over 17 years of experience in carpet fiber research and development
- Vertical integration, capital investment and expert leadership give Eco Solution Q a competitive advantage

PERFORMANCE:

- Available in over 200 color options from bright, saturated colors to a full spectrum of neutrals
- Eco Solution Q is rated excellent in cleanability, stain resistance and stain removal
- Industry leading lifetime warranty
- Performs better to wear and tear from walking, wheel chairs and other stressors
- Resists color fading and is impervious to spot cleaning with bleach based solutions and other harsh chemicals

SUSTAINABILITY:

- Eco Solution Q is the only Cradle to Cradle Certified, completely recyclable fiber on the market
- Eco Solution Q contains 25 percent post industrial content and contributes to the LEED Green Building Rating System
- Shaw collects post consumer carpet through a national recycling network and delivers it to Evergreen Nylon Recycling Facility in Augusta, Georgia
- The Evergreen facility breaks the nylon down into caprolactam monomer, the building block for new nylon, which is virtually indistinguishable from virgin materials
